

Crews are working on Tropical Storm Helene debris removal throughout the County. Please exercise caution when near debris pickup operations.

Southern Disaster Recovery will be picking up flooding debris along State Roads behind the sidewalks or to the rear of the right-of-way out of the road.

Southern Disaster Recovery will pick up storm debris on Town maintained streets.

The Commercial District is not included in debris removal. The municipalities within Haywood County are trying to seek relief for the commercial districts, but do not have confirmation currently.

Please look at the Town maintained street list below to be assured that your flood debris will be removed.

Please note that there are streets that are not completely within the Town maintained street system.

Because the Town of Maggie Valley may assist with snow removal and/or filling potholes does not mean your street is a Town maintained street.

Please get any property owners permission before placing any flood debris on others property.

Please sort/separate your flood debris i.e., wood, furniture, mattresses, and metals.
